

Information Technology Asset Management For Your Business

BusinessGUARD AssetTrack brings IT Asset Management Expertise to Your Business to Manage Software, Hardware, and Services

PCL Solutions BusinessGUARD AssetTrack provides your business with the expertise to manage your software licensing agreements, Hardware Warranties, and Technology Service Renewals.

Most companies are not experienced in dealing with technology manufacturers and vendors. This tends to lead to companies overpaying for software, hardware, and services. PCL Solutions can work on your behalf to negotiate these difficult agreements and renewals while providing comprehensive assessments of your technology.

BusinessGUARD AssetTrack is a fee based service that analyzes your specific requirements for software licensing agreements, technology procurement, and warranty management. Without the need of an in-house procurement professional well versed in technology.

BusinessGUARD AssetTrack

Main Features

Software Licensing Expertise	Analysis of your existing software infrastructure and agreements
Warranty Management	Manage the expiration of hardware warranties and lease agreements
Service Negotiation	Manage the relationship with service providers to ensure fair agreements
Technology Advisory	Provide advice and guidance on technology decisions and negotiation strategies
Affordable	Can be provided at a fraction of the cost of a new procurement or technology professional.

Software
Hardware
Services
Made Simple
